SOC for Service Organizations | Service Organizations

We focus on organizations needing guidance on adopting A.I., technology integration, growth, and upgrades; cybersecurity, cloud services, and multi-location IT planning and support.

Our technology management service includes:

MANAGED IT

Sophisticated technology management which helps you align your technology with your business goals. We ask where you are going as a company, and how technology can help you get there.

INFORMATION SECURITY ADVISORY SERVICES

Experienced guidance and execution on employee security training, risk and vulnerability assessments, risk management, managed detection and response, penetration testing, cyber insurance consulting, vendor management, vCISO service, incident response planning, disaster recovery planning, security incident prevention and support, tabletop exercises, documentation, and regulatory audit support.

We complete an annual SOC 2 TYPE II attestation to ensure we are following Best Practices for regulatory needs.

"ImageQuest is a true partner from every perspective. They truly understand what our needs are and are proactive about meeting them."

– Andy Barker, President, Houchens Insurance Group, higusa.com

"At Silicon Ranch, we deeply value strong partnerships, and ImageQuest has been an exceptional one. Over the past year, their team has not only transformed our technology infrastructure but has done so with precision, efficiency, and a true commitment to excellence. We appreciate their dedication and expertise. We're excited to continue to grow together."

- Matt Kisber, Chairman of the Board, Silicon Ranch, siliconranch.com

Our approach

Intense focus on the needs of carefully selected clients to build trust in the IT partnership. We do not do distracting one-time, isolated projects for non-partner customers.

Problems we solve include:

- Unpredictable, uncontrolled IT spend
- Uncontrolled mix of user devices, software, and applications
- Frustration with system outages/crashes and time-consuming requirements
- Inability to stay current with cybersecurity threats

- Inability to plan and execute IT goals
- Difficulties integrating and securing data across myriad of applications
- Keeping remote workers secure and productive
- Uncertainty on incorporating A.I. into business processes - or even which A.I. software to use.

ImageQuest has been a trusted partner in our growth, providing the expert guidance and cutting-edge technology solutions we need to keep moving forward. Their team understands our vision and what it takes to create a bank that is both 'uncommonly modern and surprisingly human.' We know we can count on them to deliver smart, reliable solutions that allow us to stay ahead in an ever-evolving industry.
